+91 8943265437

Thrissur, Kerala, India

Analytical and enthusiastic AI and Data Science Engineer with a B.Sc. in Computer Science and one year of professional experience developing machine-learning models, AI solutions, and interactive dashboards. Proficient in Python, SQL, Power BI, and deep-learning frameworks. Strong problem-solving ability and a passion for transforming data into actionable insights that drive business decisions.

Work Experience

AI and Data Science Engineer

Aug 2024 - Present

NextGenPro Innovations and EduPark Pvt. Ltd | Kochi, Kerala, India

- Develop and deploy machine-learning and deep-learning models for predictive analytics and automation.
- Build AI solutions for image recognition and natural-language processing projects.
- Design and maintain Power BI dashboards to visualize KPIs and optimize reporting.
- Collaborate with cross-functional teams to turn business problems into data-driven solutions.

Data Science Intern

Mar 2024 - May 2024

SMEC Labs | Kochi, Kerala, India

- Applied statistical and ML techniques to extract insights from structured datasets.
- Worked with senior analysts to implement supervised learning and visualization workflows.
- Conducted data preprocessing and feature selection to improve model accuracy.

Projects

AI-Powered Academic Assistant System

Developed an AI-integrated academic management system that automates lecture summarization, question generation, and student evaluation using NLP models. The platform includes distinct modules for Admin, HOD, Teachers, and Students with secure role-based access.

Smart Wearable Sign Language Detection

Developed an AI-powered wearable assistive device using Raspberry Pi 5, a camera strip mounted on smart glasses, and a mini speaker to detect and vocalize sign language gestures in real time. The system uses YOLOv5 for gesture recognition and text-to-speech synthesis to convert recognized signs into spoken words through the attached speaker. Additionally, it connects to a mobile device via RVNC remote control, allowing the user to interact with smartphone applications hands-free — improving accessibility for hearing- and speech-impaired individuals.

Human Identification System

Developed and implemented an artificial intelligence system for human identification using deep learning techniques. Trained a convolutional neural network (CNN) on a large dataset of facial images to accurately detect and recognize individuals in real-time. Optimized the model under various lighting conditions and facial expressions.

Skills

Programming & Analytics: Python, Pandas, NumPy, Matplotlib, Seaborn, SQL, Power BI, Tableau

Machine Learning & AI: Scikit-learn, TensorFlow, Keras, Deep Learning, NLP

Data Management: MySQL, Data Cleaning, Feature Engineering

Frameworks: Django

Soft Skills: Analytical thinking, Communication, Problem Solving, Collaboration

Education

Master in Data Science

SMEC labs

2024

Bachelor of Science Computer Science

Chinmaya Mission College

2020 - 2023

Higher Secondary Education

GVHSS Deshamangalam

2018 - 2020

Languages

Malayalam (native), English (fluent), Hindi (basic), Tamil (basic)
